MAMA KEVINA FEEDING PROGRAM-TENGERU FARM FINANCIAL REPORT 2022

HISTORICAL BACKGROUND OF THE PROGRAM

Mama Kevina Feeding program started in 2002 when the Little Sisters of St Francis of Assisi at Kijenge Mwanama Convent, in the Catholic Archdiocese of Arusha, experienced a number of children coming to their house daily, looking for something to eat. The Sisters decided to help these young children by giving them food and teach them different skills for self-reliance when they come to the convent. Later on, with the consent of the Regional Superior of the Little Sisters of St Francis of Assisi, the convent at Kijenge, became a permanent center for helping orphans/vulnerable children in getting quality education and basic skills like tailoring and small scale farming. The Little Sisters of St. Francis of Assisi, expanded their apostolate to the vulnerable children, by visiting families at Mwanama Village three times in a week. In their visit, they discovered many children living in their families without going to school because of poverty. Some of the parents cannot afford to provide one meal per day to their children. This situation moved the sisters to extend their feeding program to some families who were completely unable to get one meal per day. Mama Kevina Feeding program Centre depends mostly on the donations from well-wishers and support from the administration of the little Sisters of St Francis. We also have small income generating projects like vegetable garden, poultry and piggery project to support the feeding and education of these vulnerable children. Currently, the centre supports 116 children; some of them are orphans and others are raised by single parents (single mothers).

Appreciation

On the behalf of the little sisters of St. Francis Kijenge Community, I would like to express my sincere gratitude to Africa Directo for your continued support to our children. Your support brings hope of bright future to our young children.

This year February we received 760eur from your organization exchange rate on that time was 2563 which gives us 1947,880. We use this money to buy tank of 500litres and small pump machine. We are looking forward to develop our garden at Tengeru farm.

The impact of project

We shall be able to cultivate vegetables garden where we shall improve the diet of our children at mama Kevina Centre at Mwanama which will make children concentrate with their studies, also, we will be able to preserve water which will be used with in others project which exist in our garden such as pigs and local chicken.

Future plans

To ensure the sustainability of our feeding, the administration of Little Sisters of St.Francis in Tanzania, continue to improve her income generation projects in order to cater for the needs in the needs of the children in future.

Conclusion

We believe that by giving quality food, these children will improve their diet.

Please receive our sincere gratitude for your generosity to vulnerable children.

Thank you so much for responsibility to the needs of many people in the world may God bless the works of your hands

Sincerely yours

Sr.Magdalena Leo

Administrator Mama Kevina Centre.

EXPENDITURES
